

GRILL CABIN 4.5

PRODUCT DESCRIPTION

Amazing Grill Cabin 4,5 m² is designed for a family or a small circle of friends to have a good time, and it can be used in all weather conditions. Also, the cabin is a convenient option if you have little space in the garden. Grill Cabin made of quality materials is not only functional but also decorates the environment. A good selection of a cabin color can make a garden or a yard look exceptional.

High-quality materials ensure the longevity of the grill house and easy use. Cabin walls are made of rounded spruce boards. The roof is made of six elements, thus the system can withstand the considerable weight. Cabin roof is covered with bitumen shingles (different colors can be selected), and there are three opening double glazed windows. Besides that, the door is decorated with the original hexagonal window. You also will get 3 spruce benches inside the cabin by the walls. The floor is easily assembled from separate components. There is a convenient wood or charcoal-fired grill with a table around it inside the cabin. Above the grill, there is an adjustable chimney. Finally, the cabin is lockable and there is a small porch with a roof at the entrance.

From now on you can order Factory Painted Grill Cabins!

The high-quality preservative finish is professionally spray applied in the factory to one side of the wood. The product is treated in your choice of color. You can choose two colors for one product: one for almost all product details and another for finishing details.

FOUNDATION

It is very important to have a proper base for your Grill Cabin. Therefore, we recommend following our sketches and consulting a qualified local builder or engineer. Making sure that the base for your product fits the location is of utmost importance.

Due to an improper base, the structure may crack. If the product is unevenly seated, the geometric shape of the building may change, which can result in the door/windows twisting, and/or gaps. In the worst-case scenario, the product may even collapse.

- Before building the base, make sure you take into account the landscape and the ground conditions on which the product will stand.
- The base under the product must be prepared specifically for the product.
- The base must be homogeneous, tight, and level.
- Make sure that the properties of the base do not change over time. We recommend making the base out of concrete and water-proofing it before installation.

If you do not follow recommendations for building the base, the product will lose its warranty!
